Subject: Fwd: used back saver

hi Jim and John - i am looking to sell this thing - called a backsaver . It is electric - chargeable mobile . Very good construction - high quality - make in the Netherlands.

\$3000 CAD obo- it came with a bucket elevator in an auction - but we have no use for it . It is very nicely constructed and pretty much new . I added the large casters but there are also stubby feet for a non mobile installation.

<https://www.backsaver.nl/products-en/>

It is made for dumping barrels into a hopper . but i think it can be modified to fit different containers (or mixing bowls). The barrel is strapped in and the whole thing tips over.
